Our search engine optimization ensures high-rankings on google/yahoo/... We can help you to sell your products & services online. Our CMS solutions let you edit your website by yourself.

Anti Spam / Virus Gateway

Eliminate Spam, Viruses & Spyware

Reduce the time you spend on reading spam e-mails. Protect your e-mail users from viruses and spyware which will damage, slow down computers and consume the network bandwidth. This hardware appliance is capable of effectively restricting spam, viruses and spyware coming into your network.

Firewall / VPN Appliance

Secure Your Network from Hackers

CEYLON LINUX high-performance Firewall / VPN appliance provides the first line of defense against Internet security threats for your organization. VPN facility provides secure, always-on connectivity to applications and corporate resources for remote users.

Web Content Filter & Proxy / Cache

Control & Speed-Up Web Browsing

This appliance blocks undesirable web sites. It enforces Internet usage policy by blocking access to web sites and Internet applications that are not related to business. This is highly-configurable and has total control over specifying what is filtered & let you monitor online activities of users. Built-in Proxy/Cache features speed up web browsing & hides internal web users from the Internet, improving security.

Enterprise Email Server Solution

Secure-Reliable E-Mail, Messaging, Calendaring & Collaboration Solution

CEYLON LINUX Highly Secure & Reliable Enterprise Email Server Solution is capable of handling large number of users simultaneously without any disruption. This includes collaboration, directory service and calendaring features which are useful for enterprises, small & medium businesses, education institutions and government institutions.

Enterprise Backup / Disaster Recovery Solution

Backup & Recover Your Information Assets

On site and off site secure backup solution enables you to protect and recover your valuable data at any disastrous event.

Internet / Network Servers

Web, DNS, DHCP, LDAP, FTP, File, Radius

We install, configure & deploy any network based server ensuring high security & high performance.

Voice Over IP Gateway (PBX)

Low Cost Voice Calls with Unlimited Extensions

This PBX can interoperate with all standard telephony equipment. It includes very easy web based interface for administration. This has features like unlimited extensions, voice mail, music on hold, call parking..etc.

Total Networking Solutions

LAN, WAN, Wi-Fi

We do the planning, designing, implementation and support of simple systems to highly fault-tolerant networks and offer a complete networking solution.

High-Availability, Load Balancing & Clustering Solution

Minimize Downtime of Critical Servers

Our load balancing solution is capable of sharing the load to increase the performance & stability. Clustering solution ensures uninterrupted access to your services by thousands & millions of users accessing at the same time.

Network Security, Monitoring & Management Solution

Network Monitoring & Management

This solution guarantees that the network is secure from internal & external threats. Monitor & manage your network traffic to ensure all network services, devices are up & running.

Intrusion Detection & Prevention

Protect from Intrusion

The advantage of this solution is realtime intrusion detection & prevention to block the latest attacks. It can provide enterprise-wide protection with no degradation of network performance.

Wireless Hotspot Implementation

Usage Metering, User Authentication with scratch cards

Implement a wireless hotspot at your location to give wireless Internet access to users and charge according to their usage.

Integrated Security Appliance

Firewall, VPN, Anti Virus, Web Filtering & Anti Spam

This is an all-in-one integrated security appliance which is a preemptive protection solution for every business.

Router Appliance

Cost Effective Router

Routers are the most crucial component of the Internet. Our router appliance is the most economical & most stable solution which any company could afford. You can connect your branch office network or Internet connection using this router.
